EXPERIENCE

Alluvium IoT Solutions Pvt. Ltd.

Mar. 2025 – Present

MERN Stack Developer (Intern → Full-time)

India

- Architected and delivered enterprise web applications for logistics operations using **React.js, Node.js, Express.js, MongoDB, and PostgreSQL**, supporting multiple operational workflows.
- Engineered real-time GPS tracking and telemetry dashboards for an **IoT-based Fleet Management System** using **PostgreSQL and TimescaleDB** to handle high-frequency vehicle data.
- Optimized application performance by reducing redundant API calls and improving **API response latency** through debouncing, state-management optimization, and efficient data-fetching strategies.
- Developed reusable React.js components and UI modules using **Material UI**, improving development consistency and accelerating feature delivery across 4 enterprise products.
- Developed and maintained logistics modules including **Transport Management, Cash Register, E-Lock Management, GPS Operations, and Fleet Management** workflows.
- Diagnosed and resolved production issues across frontend and backend services while collaborating with cross-functional teams through code reviews, testing, debugging, and deployment.

PROFESSIONAL PROJECTS

Fleet Management System | *React.js, Node.js, PostgreSQL, TimescaleDB, REST APIs*

- Built interactive dashboards for **real-time vehicle tracking, telemetry monitoring, and fleet visibility**, integrating live and historical GPS data through REST APIs.
- Implemented frontend architecture for handling **high-frequency IoT data streams** while maintaining responsive dashboard performance.
- Developed E-Lock management functionality for **device assignment, tracking, journey monitoring, and lifecycle management**.
- Integrated vehicle telemetry including **location, speed, ignition, odometer, and trip information** into fleet monitoring workflows.

Transport Management System | *React.js, Node.js, Express.js, MongoDB, PostgreSQL*

- Developed **PR/LR workflow modules and operational dashboards** to support end-to-end transport and logistics management.
- Implemented operational workflows for **Cash Register, Freight Memo, E-Lock Operations, and LR management**.
- Optimized frontend-backend communication by reducing unnecessary API requests and improving **application responsiveness and data-loading performance**.

Sharanga AI | *React.js, Node.js, Express.js, MongoDB, Material UI*

- Developed web modules for **AI-powered logistics workflows**, integrating RESTful APIs for real-time data processing and application interactions.
- Built reusable frontend components and implemented responsive interfaces using **React.js and Material UI**.
- Investigated and resolved production issues through debugging, root-cause analysis, and performance optimization.

PERSONAL PROJECTS

Docmate | *React, Redux, MongoDB, Express, Node.js, Material UI* | [Live](#) | [GitHub](#)

- Built a **full-stack medical appointment platform** with patient appointment booking, doctor discovery, and an admin panel for managing doctor availability.
- Implemented frontend workflows using React and Redux with REST API integration for application data management.

ASOS Clone | *JavaScript, HTML, CSS, JSON Server* | [Live](#) | [GitHub](#)

- Developed a responsive **e-commerce web application** with product filtering, sorting, cart management, and interactive shopping workflows.
- Implemented reusable JavaScript components and integrated JSON Server for product and application data.

EDUCATION

Masai School <i>Full Stack Web Development (MERN Stack)</i>	2024 – 2025 India
SGB University <i>Bachelor of Commerce (B.Com)</i>	2019 – 2022 India

SKILLS

- Languages:** JavaScript, TypeScript
- Frontend:** React.js, Next.js, Redux, Material UI, HTML, CSS
- Backend:** Node.js, Express.js, REST APIs, JWT
- Databases:** MongoDB, PostgreSQL, TimescaleDB, Redis
- Tools & Technologies:** Git, GitHub, Docker, Kafka, Postman, Vite, Vercel
